Expected result	User can see a list of uppcoming events that all contain the phrase that the user has typed in to the search box.	
Result	Passed	

Test case ID	**List of all events 6**
Description	Check if it is possible to bookmark events and see the list of bookmarked events.
Precondition	User is logged in
Test data	-
Test steps	1. click on the “Events” button 2. click on the event name 3. click on the “Bookmark” icon
Expected result	1. Event can be bookmarked. 2. User can see all of his/her bookmarked events.
Result	Failed in version 2.0.1. No bookmarking option available. CCP2-137 - Events. No bookmarking available DONE

Test case ID	**Event management - 1**
Description	Check that administrator has option to add new events and button <+> is visible in the event page
Precondition	User has logged in as administrator
Test data	-
Test steps	1. Open event page 2. check for button <+> 3. Press <+> 4. check if the <+> transfers user to event creation page
Expected result	Administrator sees an event ad button <+> and when it’s pressed it transfers the user to a page where admin can create a new event.
Result	Passed

Test case ID	**Event management - 2**
Description	Check if correct error messages appear when skipping adding mandatory data and admin can’t add an incomplete event
Precondition	User has logged in as administrator and has opened new event creation page
Test data	-

Test steps	1. Fill only optional text fields
	  a. Try to save event
	  i. Observe *error messages*
	2. Select office from the list
	  a. Try to save event
	  i. Observe *error messages*
	3. Fill all mandatory date pickers
	  a. Try to save event
	  i. Observe *error messages*
	4. Fill all mandatory text fields
	  a. Try to save event
	  i. Observe *error messages*

Expected result	• When skipping data entry admin must be presented with the correct error message or messages, so it's clear what data must be entered. • Event is not added to the list sooner than all mandatory data is filled.
Results	Failed CCP2-243 - Events module. No mandatory fields in event creation and all fields can be left empty. **TEST FAILED**
